

AGI SURETRACK BINMANAGER®

VERSUS THE COMPETITION

	AGI SURETRACK	COMPETITOR A	COMPETITOR B	COMPETITOR C
INVENTORY	Continuous inventory readings are communicated to the AGI SureTrack online software platform.	Uses a level indicator at designated height on bin.	Hourly grain storage information.	Volume monitoring + or -4%
TEMPERATURE	2' Sensor spacing.	4' Sensor spacing.	4' Sensor spacing.	4' Sensor spacing.
MOISTURE	Moisture readings automate natural air drying and monitor performance during storage.	Available to add.	Separate cable with sensors to measure temperature and relative humidity levels.	N/A
PLENUM	Standard with BinManager. It measures temperature, relative humidity and static pressure. Readings automate fan activity.	N/A	Standard	N/A
CO2	CO2 sensor monitors for early detection of insect and fungi infestation.	N/A	N/A	N/A
FAN AUTOMATION	Characteristic based algorithms determine the correct running times for fans and heaters. Automating this process saves time and energy cost.	Fan controller connects aeration fans through live system allowing fans to be controlled remotely.	Remotely controls bin fans by receiving commands from the Gateway through the cloud from your device.	Remote fan option available.
ALERTS	There are 14 standard alerts you can customize to receive for Binmanager. Quiet hours are available to set. Each user can receive different alerts.	Custom text or emails alerts.	Available.	Customized alerts.
SOFTWARE	Complete farm management capability. Subscription includes: crop planning, field monitoring, machine management, equipment management, grain testing, markets and bookkeeping. Desktop and mobile device (Apple and Android) compatible.	Desktop, Apple and Android compatible.	Custom built software, mobile friendly, fan control.	Generate real-time charts and historical graphs of temperature data.
