

Liner Panels

Finishing the interior of a building with steel liner panels adds style and energy efficiency, and Sentinel has a wide selection of options available to suit any need and taste.

Sentinel liners are galvanized 29 gauge or 26 gauge steel

A 3' 8" girt is recommended, as it offers additional strength and reinforcement. Liner panels come in standard 7'4" or full height, include all trim and fasteners, and are available in Galvanized or Galvalume in white or your choice from a wide range of standard colors.

Partitions

Partitions can be shipped with your Sentinel building and are available in a wide range of coverings. Be sure to consult with your Sentinel Dealer or Sentinel Sales Consultant on the various options available. Partitions come standard with sheeting on one side, but can be ordered with both sides sheeted. You can also order just partition framing or sheeting.

Consider these partition options:

- | | |
|------------------------|---|
| Lateral: | Runs across the width of your building |
| Longitudinal: | Runs the length of your building |
| Partial Length: | Runs to requested length |
| Partial Height: | Runs to requested height |
