## ADJUSTED EBITDA

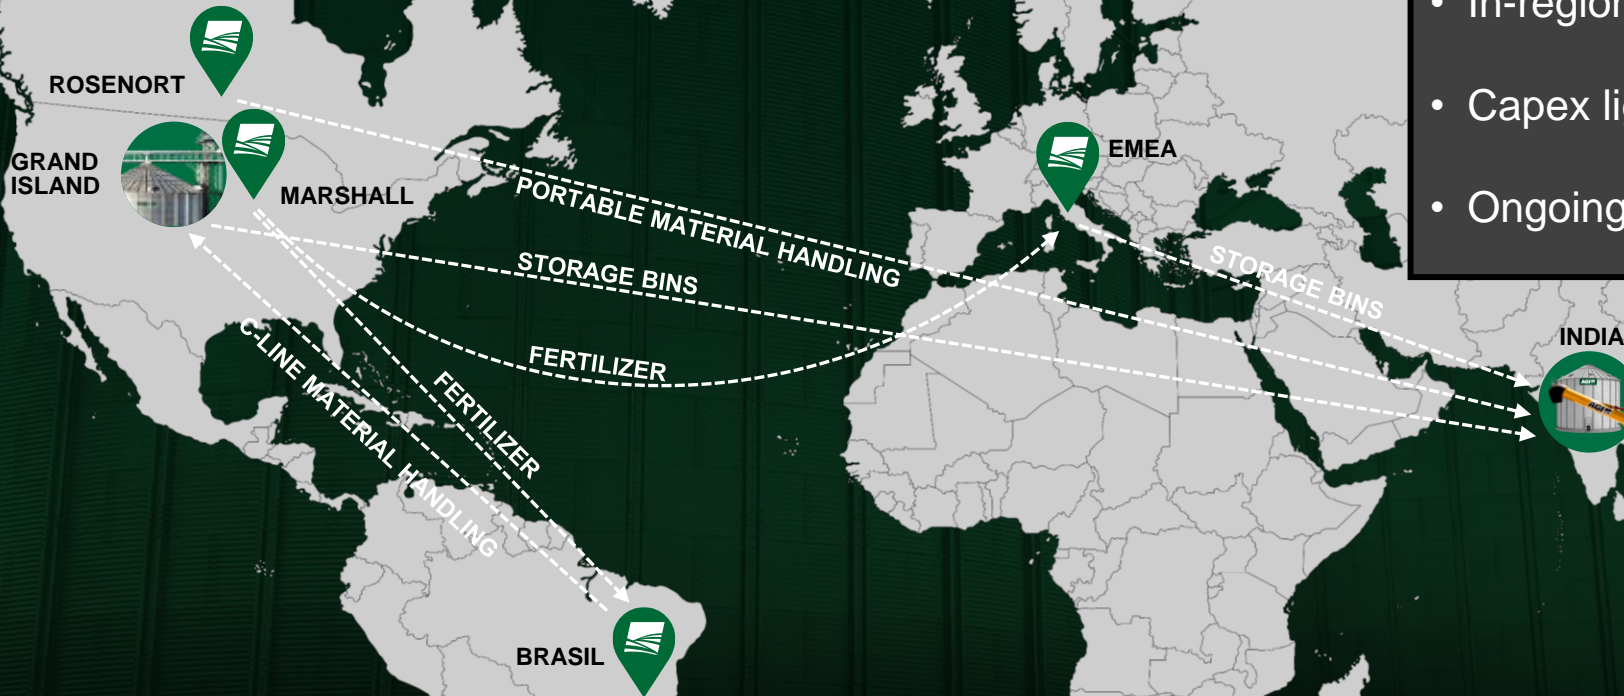

## ADJUSTED EBITDA MARGIN

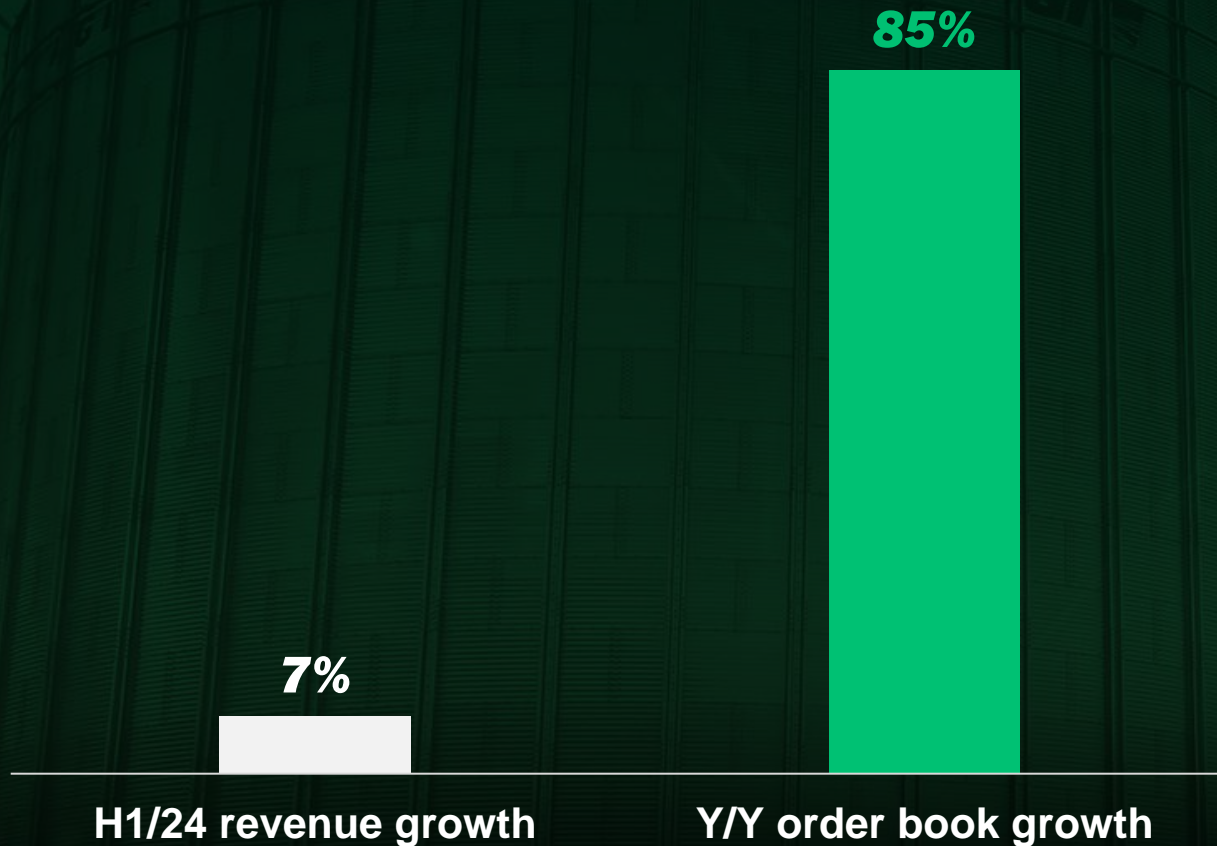

Adjusted EBITDA is a non-IFRS measure. Adjusted EBITDA Margin % is non-IFRS ratio. See "Non-IFRS and Other Financial Measures".  
Source: Company reports

# KEY PRODUCT TRANSFERS

- Expected to be ~4% of full-year revenue
- Incremental orders received
- In-region reference sites
- Capex light
- Ongoing multi-year contribution expected

# EMERGING MARKET CONTRIBUTIONS

- Emerging markets include Middle East, Africa, Southeast Asia
- High growth markets – large populations with underdeveloped infrastructure
- Strategic focus for AGI
- Clear momentum in sales activity and order book
- Meaningful contribution to overall consolidated results
- Ongoing multi-year growth trend expected

Note: Order Book is a supplementary financial measure. See "Non-IFRS and Other Financial Measures".

Note: H1/24 revenue growth includes first and second quarter results and is compared to H1/23; Y/Y order book growth compares order book size as of June 30, 2024 to June 30, 2023

## Guidance Updated

- Full-year 2024 Adjusted EBITDA expected to be in the \$300 - \$310 million range
- Full-year 2024 Adjusted EBITDA margins greater than 19.0%
- Consistent with previous messaging, we see significant strength in the Commercial segment portion of the order book which is expected to drive strong second half results with several key projects well progressed

Note: Adjusted EBITDA is a non-IFRS measure. Adjusted EBITDA margins are a non-IFRS ratio. Order book as a supplementary financial measure. See "Non-IFRS and Other Financial Measures".

# CONFIDENCE IN FULL YEAR OUTLOOK

1. Most businesses within AGI performing well
2. Record order book entering the second half
3. Strong International Commercial contributions on-track
4. Early positive signs in U.S. & Brazil Farm markets
5. Modest H2/24 order intake required to meet full year guidance
6. Product transfers & emerging market growth strategies are working
7. Recent operational excellence initiatives completed with H2/24 benefit

Note: Order book as a supplementary financial measure. See "Non-IFRS and Other Financial Measures".

# FINANCIAL OVERVIEW & OUTLOOK

## BALANCE SHEET DISCIPLINE

### Net Debt Leverage Ratio

- Committed to deleveraging
- Debt repayment is a high priority
- Target ratio of 2.5x expected to be achieved in 2024

Notes:

Total Net Debt and Adjusted EBITDA are non-IFRS measures. Total Net Debt / LTM Adjusted EBITDA ratio is a non-IFRS ratio and is interchangeable with the Net Debt Leverage Ratio non-IFRS ratio measure. See "Non-IFRS and Other Financial Measures".

Total Net Debt / LTM Adjusted EBITDA ratio as of June 30, 2024.

Source: Company reports

## WORKING CAPITAL MANAGEMENT FOCUS

### Working Capital Intensity

- Temporary ramp-up in inventory in H1/24 reflecting heightened Commercial segment order book ahead of H2/24 delivery
- Reduction in provisions post large warranty claim resolution
- Heightened internal focus on managing DSO, DIO, DPO at the facility-level

Notes:

Net Working Capital is a non-IFRS measure. Working capital intensity or Net Working Capital % Revenue is a non-IFRS ratio. See "Non-IFRS and Other Financial Measures".

DSO = Days Sales Outstanding, DIO = Days Inventory Outstanding, DPO = Days Payable Outstanding

Source: Company reports

CAD, millions

## FREE CASH FLOW

**\$65**

LTM

- New metric to replace former “Funds From Operations”
- Free Cash Flow defined as:
  - Cash provided by operating activities
  - Less: PP&E spending
  - Less: development of intangibles
- Data sourced directly from cash flow statement
- Proceeds to be directed towards the balance sheet as top priority

Note: Free Cash Flow is a non-IFRS measure. See “Non-IFRS and Other Financial Measures”. LTM Free Cash Flow figures are based on last twelve months (LTM) ending June 30, 2024.

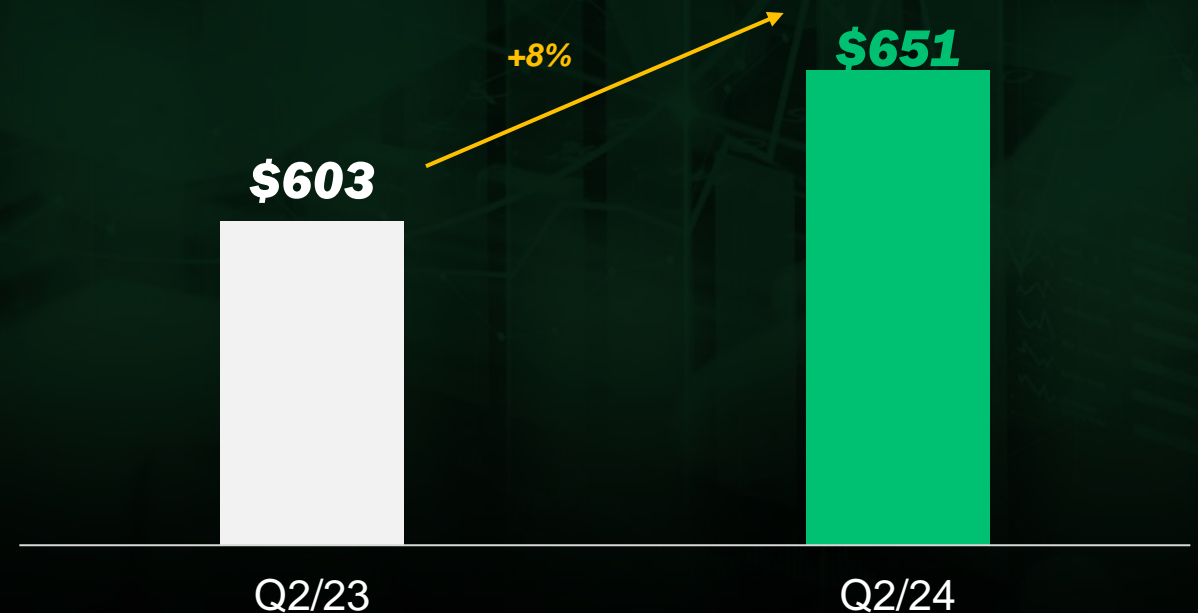

Note: Free Cash Flow is defined as cash provided by operations activities less acquisition of plant, property, and equipment, less development and purchase of intangible assets.

# FINANCIAL OVERVIEW & OUTLOOK

RUDYK**

Chief Financial Officer

## **FORWARD-LOOKING INFORMATION (1/3)**

This webcast presentation contains forward-looking statements and information (collectively, "forward-looking information") within the meaning of applicable securities laws that reflect our expectations regarding the future growth, results of operations, performance, business prospects, and opportunities of AGI. All information and statements contained herein that are not clearly historical in nature constitute forward-looking information, and the words "anticipate", "estimate", "believe", "continue", "could", "expects", "intend", "trend", "plans", "will", "may" or similar expressions suggesting future conditions or events or the negative of these terms are generally intended to identify forward-looking information. Forward-looking information involves known or unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information. In addition, this webcast presentation may contain forward-looking information attributed to third party industry sources. Undue reliance should not be placed on forward- looking information, as there can be no assurance that the plans, intentions or expectations upon which it is based will occur. In particular, the forward-looking information in this webcast presentation includes information relating to: trends in respect of our revenue, Adjusted EBITDA and Adjusted EBITDA margin (on a corporate and segment basis); trends in respect of revenue for the Farm and Commercial segments; trends in respect of our Total Net Debt/LTM Adjusted EBITDA, Working Capital Intensity, Order Book; that AGI has momentum in emerging markets in respect of sales activity and its order book; that emerging markets will have a meaningful contribution to AGI and that multiyear growth trends will continue; our prioritization of debt repayment and expectation that we will achieve our Net Debt/LTM Adjusted EBITDA target ratio of ~2.5x in 2024 and that strong Adjusted EBITDA and Adjusted EBITDA margin results will be achieved in 2024; that our 2024 Adjusted EBITDA is expected to be \$300 to \$310 million; that 2024 Adjusted EBITDA margins are expected to be greater than 19%; that positive trends will continue in the U.S. and Brazil farm markets; that only a modest order intake is required to meet full year guidance; that recent operational initiatives will translate into benefits in the second half of 2024; that the significant strength in the commercial segment of the order book is expected to drive strong second half; the expectation to see a turning of sentiment in the U.S. and Brazil Farm markets; that product transfers are expected to contribute 4% to total revenue for 2024; that there will be significant strength in the international commercial segment; and that our heightened internal focus on DSO, DIO and DPO will have a positive impact on Working Capital Intensity.

Such forward-looking information reflects our current beliefs and is based on information currently available to us, including certain key expectations and assumptions concerning: anticipated crop yields and production in our market areas; the financial and operating attributes of acquired businesses and the anticipated future performance thereof; the value of acquired businesses and assets and the liabilities assumed (and indemnities provided) by AGI in connection therewith; anticipated financial performance; future debt levels, the Company's ability to repay its existing debt and the timing thereof; business prospects and strategies, including the success of our operational excellence initiatives; product and input pricing; the scope, nature, timing and cost of re-supplying certain equipment and re-completing certain work that has previously been supplied or completed pursuant to warranty obligations or otherwise; regulatory developments; tax laws; the sufficiency of budgeted capital expenditures in carrying out planned activities; currency exchange rates, inflation rates and interest rates; the cost of materials, labour and services and the impact of inflation rates and/or supply chain disruptions and/or labour activity thereon; the impact of competition; the general stability of the economic and regulatory environment in which the Company operates; the timely receipt of any required regulatory and third party approvals; the ability of the Company to obtain and retain qualified staff and services in a timely and cost efficient manner; the amount and timing of the dividends that we expect to pay; the ability of the Company to obtain financing on acceptable terms; the regulatory framework in the jurisdictions in which the Company operates; the ability of the Company to successfully market its products and services; and that a pandemic or other regional or global health related emergency will not have a material impact on our business, operations, and financial results going forward.

## **FORWARD-LOOKING INFORMATION (2/3)**

Forward-looking information involves significant risks and uncertainties. A number of factors could cause actual results to differ materially from results discussed in the forward-looking information, including: general economic and business conditions and changes in international, national and local macroeconomic and business conditions, as well as sociopolitical conditions in certain local or regional markets, including as a result of the conflicts between Russia and Ukraine and between Israel and Hamas, and the respective response thereto from other countries and institutions (including trade sanctions and financial controls), which has created volatility in the global economy and could continue to adversely impact economic and trade activity; the effects of global outbreaks of pandemics or contagious diseases or the fear of such outbreaks, such as the coronavirus (COVID-19) pandemic, including on our operations, our personnel, our supply chain, the demand for our products and services, our ability to expand and produce in new geographic markets or the timing of such expansion efforts, and on overall economic conditions and customer confidence and spending levels; the ability of management to execute the Company's business plan; fluctuations in agricultural and other commodity prices, interest rates, inflation rates and currency exchange rates; crop planting, crop conditions and crop yields; weather patterns, the timing of harvest and conditions during harvest; volatility of production costs, including the risk of production cost increases that may arise as a result of ongoing high inflation rates and/or supply chain disruptions, and the risk that we may not be able to pass along all or any portion of increased costs to customers; governmental regulation of the agriculture and manufacturing industries, including environmental and climate change regulation; risks related to the Government of Canada amendments to the deceptive marketing practices provisions of the Competition Act (Canada) that specifically address greenwashing; actions taken by governmental authorities, including increases in taxes, changes in government regulations and incentive programs, and actions taken in connection with local or global outbreaks of pandemics or contagious diseases or the fear of such outbreaks, such as the COVID-19 pandemic; risks inherent in marketing operations; credit risk; the availability of credit for customers; seasonality and industry cyclicality; potential delays or changes in plans with respect to capital expenditures; the cost and availability of sufficient financial resources to fund the Company's capital expenditures; failure of the Company to realize the benefits of its operational excellence initiatives; incorrect assessments of the value of acquisitions, failure of the Company to realize the anticipated benefits of acquisitions, including to realize anticipated synergies and margin improvements, and the assumption of liabilities associated with acquisitions and/or the provision of indemnities to vendors in respect of any such assumed liabilities or otherwise; volatility in the stock markets including the market price of our common shares and in market valuations; competition for, among other things, customers, supplies, acquisitions, capital and skilled personnel; the availability of capital on acceptable terms; dependence on suppliers; changes in labour costs and the labour market, including the risk of labour cost increases that may arise as a result of ongoing high inflation rates and/or a scarcity of labour and/or labour activities; the impact of climate change and related laws and regulations; changes in trade relations between the countries in which the Company does business, including between Canada and the United States; cyber security risks; adjustments to and delays or cancellation of our order book; the requirement to re-supply equipment or re-complete work previously supplied or completed at AGI's cost, and the risk that AGI's assumptions and estimates made in respect of such costs and underlying the provision for warranty accrual and remediation in our consolidated financial statements related thereto and insurance coverage therefor will prove to be incorrect as further information becomes available to AGI; and the risk of litigation or unsuccessful defense of litigation in respect of equipment or work previously supplied or completed or in respect of other matters and the risk that AGI incurs material liabilities in connection with such litigation that are not covered by insurance in whole or in part.

These and other risks and uncertainties are described under "Risks and Uncertainties" in our most recently filed interim and annual MD&A and in our most recently filed Annual Information Form, all of which are available under the Company's profile on SEDAR+ [[www.sedarplus.ca](http://www.sedarplus.ca)]. These factors should be considered carefully, and readers should not place undue reliance on the Company's forward-looking information. We cannot assure readers that actual results will be consistent with this forward-looking information. Further, AGI cannot guarantee that the anticipated revenue from its order book will be realized or, if realized, will result in profits or Adjusted EBITDA. Delays, cancellations and scope adjustments occur from time-to-time with respect to contracts reflected in AGI's order book, which can adversely affect the revenue and profit that AGI actually receives from its order book. Readers are further cautioned that the preparation of financial statements in accordance with IFRS requires management to make certain judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent liabilities. These estimates and related assumptions may change, having either a negative or positive effect on profit, as further information becomes available and as the economic environment changes. Without limitation of the foregoing, the provisions for equipment rework and remediation costs disclosed in our recently filed interim MD&A under "Remediation costs and equipment rework" required significant estimates and assumptions about the scope, nature, timing and cost of work that will be required. It is based on management's assumptions and estimates at the date thereof and is subject to revision in the future as further information becomes available to the Company. The forward-looking information contained herein is expressly qualified in its entirety by this cautionary statement. The forward-looking information included in this webcast presentation is made as of the date of this webcast presentation and AGI undertakes no obligation to publicly update such forward-looking information to reflect new information, subsequent events or otherwise unless so required by applicable securities laws.

## **FORWARD-LOOKING INFORMATION (3/3)**

### **Financial Outlook**

Also included in this webcast presentation is an estimate of AGI's 2024 Adjusted EBITDA, 2024 Adjusted EBITDA margin %, and target net debt leverage ratio to be achieved in 2024, which are based on, among other things, the various assumptions disclosed in this webcast presentation including under "Forward-Looking Information" and including our assumptions regarding the Adjusted EBITDA contribution that AGI anticipates receiving from revenue growth in 2024 in part as a result of the 8% YOY increase in AGI's order book at June 30, 2024 . To the extent such estimates constitute financial outlooks, they were approved by management on August 7, 2024, and are included to provide readers with an understanding of AGI's anticipated 2024 Adjusted EBITDA, Adjusted EBITDA margin %, and anticipated net debt leverage ratio to be achieved in 2024 based on the assumptions described herein and readers are cautioned that the information may not be appropriate for other purposes.

# **PRESENTATION OF FINANCIAL INFORMATION**

## **PRESENTATION OF FINANCIAL INFORMATION**

All financial information of AGI included in this presentation is reported in Canadian dollars and (except for forward-looking financial information) has been derived from audited and unaudited historical financial statements of AGI that were prepared in accordance with International Financial Reporting Standards ("IFRS").

During the year ended December 31, 2023, AGI replaced the term "sales" with "revenue"; however there has been no change to the underlying calculation. Revenue is the sale of goods primarily recognized at a point in time when AGI satisfies a performance obligation and control of the goods is transferred from AGI to its customer. Revenue from contracts with customers is recognized at an amount that reflects the consideration to which AGI is entitled to in exchange for those goods.

## **NON-IFRS AND OTHER FINANCIAL MEASURES**

This webcast presentation makes reference to certain specified financial measures, including non-IFRS financial measures (historical and forward-looking), non-IFRS ratio and supplementary financial measures. Management uses these financial measures for purposes of comparison to prior periods and development of future projections and earnings growth prospects. This information is also used by management to measure the profitability of ongoing operations and in analyzing our business performance and trends. These specified financial measures are not recognized measures under IFRS, do not have a standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement our financial information reported under IFRS by providing further understanding of our results of operations from management's perspective. Accordingly, they should not be considered in isolation nor as a substitute for analysis of our financial information reported under IFRS. We use specified financial measures to provide supplemental measures of our operating performance and thus highlight trends in our core business that may not otherwise be apparent when relying solely on IFRS financial measures. Management also uses specified financial measures in order to prepare annual operating budgets and to determine components of management compensation. We strongly encourage investors to review our historical consolidated financial statements, including our consolidated financial statements for the three months and six months ended June 30, 2024 (the "consolidated financial statements"), and other publicly filed reports in their entirety and not to rely on any single financial measure or ratio. The following is a list of specified financial measures that are referenced throughout this webcast presentation.

# PRESENTATION OF FINANCIAL INFORMATION

**Adjusted EBITDA** (adjusted earnings before interest, taxes, depreciation, and amortization) is a non-IFRS financial measure and its most directly comparable financial measure that is disclosed in our consolidated financial statements is profit (loss) before income taxes. For an explanation of the composition of Adjusted EBITDA (historical and forward-looking), an explanation of how Adjusted EBITDA provides useful information to an investor, an explanation of the additional purposes for which management uses Adjusted EBITDA, and a quantitative reconciliation of Adjusted EBITDA to profit (loss) before income taxes, see the information under the heading: (i) "Non-IFRS Measures" in our MD&A for the years ended December 31, 2019 and 2020; and (ii) "Non-IFRS and Other Financial Measures" in our MD&A for the years ended December 31, 2021, 2022 and 2023 and for the three and six month periods ended June 30, 2024 and 2023; which information (and related reconciliations referenced therein) are incorporated by reference herein. The aforementioned MD&As are available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca). The following table reconciles profit (loss) before income taxes to Adjusted EBITDA for each of the LTM (12-month periods) ended presented.

## PRESENTATION OF FINANCIAL INFORMATION

**Adjusted EBITDA Margin %** is a non-IFRS ratio and is defined as Adjusted EBITDA divided by revenue. Adjusted EBITDA margin % is a non-IFRS ratio because one of its components, Adjusted EBITDA, is a non-IFRS financial measure. Management believes Adjusted EBITDA margin % is a useful measure to assess the performance and cash flow of AGI. AGI presents Adjusted EBITDA Margin % on a corporate basis and separately for its Farm and Commercial segments.

**Free Cash Flow** is defined as cash provided by operating activities less acquisition of property, plant and equipment and less development and purchase of intangible assets. Free cash flow is a non-IFRS financial measure and its most directly comparable financial measure that is disclosed in our consolidated financial statements is cash provided by operating activities. Management believes that free cash flow provides useful information about the Company's ability to generate cash that can be used to fund ongoing and prospective strategic initiatives, reduce debt, or pursue other initiatives enhance shareholder value after investing in capital expenditures that are required to maintain and grow the Company. Management uses free cash flow to help monitor the operational efficiency and financial flexibility of the Company as well as an input into executive compensation plans, among other uses.

Free Cash Flow

Cash provided by operating activities	163,087	118,510
Less: acquisition of property, plant and equipment	(32,270)	(44,970)
Less: development and purchase of intangibles	(20,157)	(8,681)
<b>Free cash flows</b>	<b>110,660</b>	<b>64,859</b>

## PRESENTATION OF FINANCIAL INFORMATION

**Net Working Capital** is a non-IFRS financial measure and its most directly comparable financial measure that is disclosed in our consolidated financial statements is Total Current Assets. Net Working Capital is defined as Total Current Assets less cash and cash equivalents, restricted cash, current portion of notes receivable, due from vendor, current portion of derivative instruments, income taxes recoverable, accounts payable, customer deposits and provisions. Management believes that Net Working Capital is a useful measure to evaluate the capital required to support AGI's sales and operations. The following table reconciles Total Current Assets to Net Working Capital as at March 31, 2019, 2020, 2021, 2022, 2023 and 2024, June 30, 2019, 2020, 2021, 2022, 2023, and 2024, September 30, 2019, 2020, 2021, 2022 and 2023 and December 31, 2019, 2020, 2021, 2022 and 2023.

**Net Working Capital as a % of Revenue or Working Capital Intensity** is a non-IFRS ratio and is defined as Net Working Capital divided by quarterly revenue and divided by four to annualize the ratio. Net Working Capital as a % of Revenue is a non-IFRS ratio because one of its components, Net Working Capital, is a non-IFRS financial measure. Management believes Net Working Capital as a % of revenue is a useful measure to assess the short-term cash requirements to support sales and operations.

# PRESENTATION OF FINANCIAL INFORMATION

**Order book** is a supplementary financial measure and is defined as the total value of committed sales orders that have not yet been fulfilled that: (a) have a high certainty of being performed as a result of the existence of a purchase order, an executed contract or work order specifying job scope, value and timing; or (b) has been awarded to AGI or its divisions, as evidenced by an executed binding letter of intent or agreement, describing the general job scope, value and timing of such work, and where the finalization of a formal contract in respect of such work is reasonably assured. AGI previously used the term "backlogs" instead of "order book", however there has been no change to the definition or underlying calculation.

**Revenue by Segment, Revenue by Geography, International Revenue, and International Revenue as % of Total Revenue.** The revenue information in this presentation that is presented on a segment and/or geographic basis are supplementary financial measures and are used to present AGI's revenues by segment and/or geography. International Revenue is defined as all revenue generated outside of the U.S. and Canada.

**Total Net Debt** is a non-IFRS financial measure and its most directly comparable financial measure that is disclosed in our consolidated financial statements is Long-Term Debt. Total Net Debt is defined as the sum of long-term debt, convertible unsecured subordinated debentures, senior unsecured subordinated debentures, and lease liabilities less cash and cash equivalents. Management believes that Total Net Debt is a useful measure to evaluate AGI's capital structure and to provide a measurement of AGI's total indebtedness. The following table reconciles Long Term Debt to Total Net Debt as at March 31, 2019, 2020, 2021, 2022, 2023, and 2024, June 30, 2019, 2020, 2021, 2022, 2023 and 2024, September 30, 2019, 2020, 2021, 2022 and 2023 and December 31, 2019, 2020, 2021, 2022 and 2023.

**Total Net Debt / LTM (last 12 month) Adjusted EBITDA Ratio** (also referred to herein as Net Debt Leverage Ratio) is a non-IFRS ratio and is defined as Total Net Debt divided by Adjusted EBITDA for the last twelve months period. Total Net Debt / LTM Adjusted EBITDA is a non-IFRS ratio because its components, Total Net Debt and Adjusted EBITDA, are non-IFRS financial measures. Management believes Total Net Debt / LTM Adjusted EBITDA is a useful measure to assess AGI's leverage position. AGI uses also the term "Net Debt Leverage Ratio" in this presentation in place of "Total Net Debt / LTM (last 12 month) Adjusted EBITDA"; however there is no difference to underlying calculation of the ratio.
